

IN THE CLAIMS

For the Examiner's convenience the enclosed list of claims is a list of all pending claims including those claims that have not been amended by way of the present amendment.

Please amend claim 6 and 9.

Please add new claims 21 to 40.

1. (Original) An apparatus, comprising:  
a housing;  
a first panel coupled to the housing and including a handle; and  
a second panel coupled to the housing, wherein when the second panel is unfolded from the housing a stand and a keyboard are exposed.
2. (Original) The apparatus of claim 1, wherein the housing includes a front side and a back side, and wherein the first panel is coupled to the housing at the back side.
3. (Original) The apparatus of claim 2, wherein the first panel is affixed to the back side.
4. (Original) The apparatus of claim 3, wherein the first panel includes a guiding mechanism to guide the handle.
5. (Original) The apparatus of claim 4, wherein the second panel is coupled to the housing at the back side and below the first panel.

6. (Amended) The apparatus of claim 5, wherein the second panel is [coupled] attached to the housing at substantially near bottom of the back side of the housing using a hinge mechanism.

7. (Original) The apparatus of claim 6, wherein the hinge mechanism is to assist with folding or unfolding of the second panel relative to the back side of the housing.

8. (Original) The apparatus of claim 7, wherein the second panel includes the stand and a keyboard tray which includes the keyboard.

9. (Amended) The apparatus of claim 8, wherein the keyboard tray is partially wrapped by the stand and can be slid into or out of the stand.

10. (Original) The apparatus of claim 9, wherein the keyboard is a wireless keyboard.

11. (Original) The apparatus of claim 9, wherein the keyboard tray further includes a remote controller.

12. (Original) The apparatus of claim 11, wherein the remote controller is capable of sending infrared (IR) signals.

13. (Original) The apparatus of claim 11, wherein the remote controller includes a mouse pad.

14. (Original) The apparatus of claim 11, wherein the keyboard tray further includes a wireless telephone handset.

15. (Original) The apparatus of claim 14, wherein the wireless telephone handset is to include a Bluetooth communication module.

16. (Original) The apparatus of claim 9, wherein the front side of the housing includes a display screen.

17. (Original) The system of claim 16, wherein the front side of the housing further includes a fingerprint sensor.

18. (Original) The apparatus of claim 17, wherein the front side of the housing further includes a video camera.

19. (Original) The apparatus of claim 18, wherein the front side of the housing further includes one or more speakers.

20. (Original) The apparatus of claim 19, wherein the front side of the housing further includes an array of one or more microphones.

21. (New) An apparatus, comprising:  
a keyboard tray including a wireless keyboard and a stand, the keyboard slide-able into or out of the stand, wherein the stand is coupled to a housing and foldable relative to the housing, and wherein the housing includes a display screen and a carrying handle.

22. (New) The apparatus of claim 21, wherein the stand is to support the housing in a substantially upright position

23. (New) The apparatus of claim 21, wherein the housing further includes an array of two or more microphones and a video camera, wherein the microphones, the video camera, and the display screen are oriented in generally same direction.

24. (New) The apparatus of claim 21, wherein the housing further includes a wireless communication interface to receive wireless signals from a remote control.

25. (New) The apparatus of claim 24, wherein the keyboard tray further includes the remote control and a telephone handset.

26. (New) The apparatus of claim 25, wherein the remote control is to communicate with the wireless communication interface using Bluetooth.

27. (New) A system, comprising:

a processor;

a display coupled to the processor;

a first communication interface coupled to the processor, wherein the display, the processor and the first communication interface are included in a housing; and

a wireless telephone handset coupled to the first communication interface to be used for voice over Internet protocol (VoIP) calls, wherein the wireless

telephone handset is included in a keyboard tray having a stand to support the housing in a substantially upright position.

28. (New) The system of claim 27, wherein the first communication interface is to be used for short range wireless communication.

29. (New) The system of claim 28, wherein the short range wireless communication is based on Bluetooth.

30. (New) The system of claim 27, further comprising:  
a second communication interface coupled to the processor, wherein the second interface is to be used for wireless local area network (WLAN) communications and to support the VoIP calls.

31. (New) The apparatus of claim 27, wherein the housing further includes a finger print sensor to be used for authentication.

32. (New) The system of claim 27, further comprising:  
a keyboard coupled to the processor, the keyboard included in a keyboard tray, the keyboard tray having a stand attached to and foldable from the housing to support the housing in a substantially upright position.

33. (New) An apparatus, comprising:  
a housing including a display, a processor coupled to the display, a Bluetooth communication interface, and a wireless local area network (WLAN) communication interface;

a handle coupled to the housing, the handle is to include an antenna to be used for wireless communication using the WLAN communication interface;  
and

a keyboard tray coupled to the housing, the keyboard tray is to include a keyboard and a stand, wherein the stand is foldable relative to the housing and is to support the housing in a generally upright position.

34. (New) The apparatus of claim 33, wherein the housing further includes a speaker and one or more microphones oriented in generally same direction as the display.

35. (New) The apparatus of claim 34, wherein the housing further includes a video camera and a fingerprint sensor oriented in generally same direction as the display.

36. (New) The apparatus of claim 33, wherein the keyboard tray further includes a remote control to control execution of an application displayed on the flat screen display screen via the Bluetooth communication interface.

37. (New) The apparatus of claim 33, wherein the keyboard tray further includes a telephone handset to communicate with the Bluetooth communication interface and to be used for voice over Internet protocol (VoIP) calls via the WLAN communication interface.

38. (New) An apparatus, comprising:  
a frame to support a housing in an upright position;

a tray partially enclosed by the frame and slide-able into or out of the frame,  
wherein the tray is to include a wireless keyboard;

a wireless remote control adapted to rest on the tray to a first side of the  
wireless keyboard; and

a wireless telephone handset adapted to rest on the tray to a second side of the  
wireless keyboard.

39. (New) The apparatus of claim 38, wherein the wireless keyboard, the  
wireless remote control, and the wireless telephone handset are to operate using  
Bluetooth communication protocol.

40. (New) The apparatus of claim 38, wherein the frame is attached to the  
housing and foldable from the housing to support the housing in the upright  
position.
